- 2 x S-4000S 08x32 FOH rack
- 2 x S-4000R Remote Control
- 1 x S-4000SP

System Integration

Introduction

Combi Sound is a Rental Company, based outside of Skanderborg in Jutland, Denmark. Apart from the rental side of the business, they are also having a sales department, that can assist costumers with both small and large solutions, when it comes to choosing the right gear.

System

In order to have the most flexible solution, the S-4000 systems are used as two separate systems. In this way they can be used with two smaller consoles or be joint together, when larger channel count s are needed. The FOH racks are mounted with analogue multi-core plugs, for easy and fast setup.

Point of Selection

Karsten Dalsgaard, Owner

After several tests of the S-4000 Digital Snake system, we decided to purchase two systems.

Because we are doing many kind of jobs, from small AV productions to large scale concerts and festivals, they systems fits very nicely with our current line-up of analogue and digital consoles.

The ease of use and good sound quality, was two of the reasons to choose the S-4000 systems.
