**Introduction**

For more than 20 years DPA Soundco have been one the major Rental companies in Denmark. Apart from doing business in Denmark, they are also working internationally in Sweden, Norway, Germany and France. The Orange Stage at Roskilde Festival, have been one the companies main jobs for a hole decade.

**System**

The first investment in RSS equipment was for two S-4000S Digital Snake systems mainly used for Analog Midas Consoles and Yamaha PM5D, followed by two S-1608/0816 systems for their current LS-9 consoles.

The decision to add a M-400 Digital mixer, was a logical choice, as it complements the range of Digital Snake systems.

**Point of Selection**

***Bendt "Bitte" Iversen, Owner***

Because we are a Company with many different types of jobs, we are always searching for equipment, that can solve the task in the best possible way. Due to the diversity in our customer base, the use of the Digital Snake systems are very useful.

Recently we did a tour with Danske Bank, where each event was performed with actors or dancers from The Royal Opera and other major theaters. All shows done with the V-Mixing System.

DPA also chose to make use of the V-Mixing system, when Bang & Olufsen launched their new Beosound 5 in Denmark and Sweden.
